Att: Mr. Hofmann, President

Dear Mr. Hofmann,

### Re: Recommendation

I am pleased to inform you about the significant improvements in the production and product quality as well as the significant cost savings, that we are facing since we have introduced the **ColorSave 1000** equipped with the new micro-dosing feature into our plant.

The lack of an accurate dosing equipment in the past, capable of handling minute quantities of masterbatch, similar to the **ColorSave 1000**, forced us to employ a costly manual mixing of the virgin material and the masterbatch specially when considering the restrictions of our raw materials conveying systems and the "tied" manufacturing and operating procedures related to manufacturing of medical devices in a clean room atmosphere.

I am also pleased to inform you that **ColorSave 1000** had successfully passed all the monthly routine dosing tests that applied by our QA department during over a year.

As you know, this new configuration has proved so successful and worthwhile, that we have decided to purchase another unit for our plant.

We will be pleased to recommend the ColorSave 1000 system with the new feature for micro-dosing to other potential customers.

Sincerely,

Ofer Shay

Managing Director
