To: Eli Margalit, LIAD Weighing & Control Systems  
From: Martin Staps, Jardin Netherlands b.v.

Jardin Netherlands b.v. has purchased and installed dozens of ColorSave 1000 systems — for all our injection-molding machines' masterbatch dosing needs. We are very satisfied with the significant improvements both in quality and in material flow.

As a leading manufacturer of garden furniture, every saving of masterbatch adds up to enormous savings for us. With the ColorSave, we have saved over 30% of masterbatch. I should also point out that there have been no rejects resulting from non-homogenic masterbatch.

We are very pleased with the ColorSave's accuracy and also that it is so easy to install and maintain; we strongly recommend the feeder system to other plastics manufacturers.

Sincerely,

**Martin Staps**
